

Cross Functional Collaboration

Course Description:

This training workshop identifies what creates silos between departments and how to knock them down. Cross functional collaboration is about creating an environment where all departments work towards a common goal. Identifying and collaborating the skillsets from individuals and teams, expresses the value everyone brings to the mission. Once people understand the value each member and department bring to the mission, teams become collaborative and synergistic.

Course Objectives:

After completing this, team members and leaders will have the tools and deep understanding of how to work with others and achieve outstanding results.

- Understand how competing priorities can be aligned to accomplish common goals
- Learn how to change what are perceived as problems into challenges and opportunities to work together
- Learn how to appreciate the value and expertise of individuals and groups.
- Learn the tools for cross functional problem solving
- Maintain professionalism when conflict arises.
- Strategies for improving relationships between cross functional teams
- Learn how to positively influence cross functional teams
